## ***Offshore Scotland Integrated Gravity / Magnetic / Seismic / Geologic Structural Interpretation***

### ***Moray Firth, Outer Moray Firth***

**Survey Size:**  
2,750 kilometers

**Data Spacing:**  
5 km grid

**Data Provided:**

- Bouguer gravity/bathymetry profiles of each traverse at seismic scale
- Bouguer Gravity Map
- Bathymetry Map
- Total Magnetic Intensity Map (aeromagnetic data source - Geological Society of Great Britain) on same bases as the Bouguer Gravity Map and Bathymetry Map
- Report discussing methods and results

**Total Cost:**

**Call for quotation, partial and complete purchases available.**

## **Integrated Gravity / Magnetic / Seismic / Geologic Structural Interpretation**

**Data Provided:**

- Magnetic Basement and Susceptibility Map
- High-Density Basement Map
- Diagnostic profiles along a few key seismic lines showing magnetic basement, susceptibility, and high-density basement
- Density vs. depth relationship
- Report discussing methods and results of interpretation

**Interpretation Cost:**

**Call for quotation, partial and complete purchases available.** (Conditions of Sale: Purchase of seismic data (GECO) not required to purchase grav/mag data, but is required for purchase of integrated interpretation.)
